IT Systems & Network Administration • AWS Certified Solutions Architect • CompTIA Network+

EXPERIENCE

IT Technician — The Polo Club of Boca Raton

Boca Raton, FL | 2023–Present

- Maintained network infrastructure across a multi-building campus — UniFi wireless, managed switches, VLANs, DHCP/DNS, and Auvik monitoring — covering connectivity for 500+ employees including staff without M365 accounts.
- Administered Active Directory and Microsoft 365 environments, managing user accounts, group policy, security group permissions, conditional access policies, and license provisioning across multiple departments.
- Managed endpoints using Endpoint Central, Atera, and Goverlan — handling patch cycles, OS imaging and deployment, remote remediation, and CrowdStrike across all devices.
- Resolved hardware, software, network, and account incidents across the organization, operating a structured ticketing system and building a resolution knowledge base that reduced repeat escalations.
- Executed migration from legacy Cisco desk phones to Microsoft Teams-based Yealink VoIP devices, handling device staging, configuration, and end-user training across all departments with minimal disruption to daily operations.
- Supported POS systems across restaurant and retail operations, along with iOS corporate devices, Android digital signage, and Linux systems throughout the property.
- Troubleshoot and maintained a Dante-networked audio system distributed across multiple buildings and event spaces, resolving signal routing, device configuration, and connectivity issues in a live-event environment.
- Assisted in the IT buildout for a new club restaurant, working with vendors and third-party support teams on infrastructure setup, POS deployment, and network connectivity to ensure all systems were operational by opening day.

Administrative Assistant — Rivero Real Estate Inc.

Miami, FL | 2021–2023

- Supported IT needs for a small office environment, handling workstation setup, email configuration, printer troubleshooting, and basic networking alongside administrative responsibilities.

TECHNICAL SKILLS

Networking: TCP/IP, DHCP, DNS, VLANs, Ubiquiti UniFi, Auvik, firewall/routing fundamentals

Identity & Access: Active Directory, Microsoft 365 Admin, Group Policy, Conditional Access, MFA

Endpoint Management: Endpoint Central, Atera, Goverlan, CrowdStrike, OS imaging & deployment
